

Alex Carmichael

Hull, UK — open to relocation | alexcarmichael857@gmail.com | linkedin.com/in/alexcarmichael12

SUMMARY

Full-stack developer with nearly four years' experience, progressing from apprenticeship to developer, building production web applications in C#, ASP.NET, JavaScript and Vue. Currently the main developer on an e-commerce platform and CMS for one of the UK's largest independent laboratory supplies distributors, and recently migrated a full enterprise CRM's front-end onto the latest Kendo UI release. Comfortable owning features end to end across the stack, with solid fundamentals in version control, testing and Agile delivery. Open to relocation.

SKILLS

Languages & Frameworks: C#, ASP.NET, JavaScript, Vue, HTML, CSS, SASS, Kendo UI

Databases: SQL Server, MySQL

Tools & Practices: Git, Visual Studio, Azure DevOps, CI/CD, Agile, AI coding assistants (Copilot, Claude Code)

EXPERIENCE

Junior Software Developer

May 2024 – Present

Styletech Solutions

- Main developer from the outset on an e-commerce platform and CMS for Scientific Laboratory Supplies — the UK's largest independent supplier of laboratory chemicals, equipment and consumables — building the front-end in Vue against an ASP.NET / C# back-end.
- Designed and built a new CRM dashboard end to end where none existed before, giving the team a single self-serve view of customer data in place of manual, ad-hoc lookups.
- Migrated a full enterprise CRM's front-end from a legacy Kendo UI version to the current release, clearing long-standing UI tech debt and bringing the application onto a supported, modern component library.
- Built back-end features and optimised SQL Server queries in C# / ASP.NET across both the platform and the CRM.
- Introduced CSS-variable theming, later migrated to SASS, for cleaner and more maintainable styling across the application.

Apprentice Software Developer

Jul 2022 – May 2024

Styletech Solutions

- Built full-stack features across front-end and back-end using .NET, JavaScript and SQL Server, shipping into enterprise applications using Git version control.
- Delivered a dark theme across the application, improving usability and accessibility for end users.

EDUCATION

City & Guilds Level 4 — Software Developer (ST0116/AP05)

2022 – 2024
